

Transport Access Program

Leura Station Upgrade

DECEMBER 2016 COMMUNITY NOTIFICATION

Overview

Leura Station is being upgraded as part of the Transport Access Program, a NSW Government initiative to provide improved accessibility for people with disabilities, limited mobility, parents/carers with prams and tourists with luggage. The upgrade includes:

- a new lift and stairs
- a new canopy over the lift, stairs and part of the platform
- upgraded toilet facilities
- formalised taxi rank and new kiss and ride zone on Railway Parade

- an accessible path from the station to the taxi and kiss and ride zone
- new bicycle facilities
- improved lighting and CCTV security surveillance.

Earlier this year, consultation was undertaken with key local stakeholders and the community to understand community needs and values. This consultation was undertaken through a community information session which was followed by the public display of the Leura Station Upgrade Review of Environmental Factors.

Designing the Leura Station Upgrade

Leura Station and the surrounding village precinct is a unique area with many natural and heritage values. Your feedback provided earlier this year demonstrated the importance of Leura's heritage and scenic nature to the community and has played an important role in shaping the design development of the project.

Experienced heritage architects and urban design specialists have overseen and contributed to the design of the project. As part of this process, design principles specific to the Leura region were developed to guide the design.

The design principles included:

- referencing existing buildings in Leura Mall in the lift structure and awning design
- selecting materials and finishings to ensure that the project is cohesive with and sensitive to the existing village character
- using landscaped planting along Railway Parade to soften new built elements.

An artist's impression has been prepared (overleaf) to show how the design has progressed. The captions highlight key features of the design and how community feedback has contributed to its development.

We still have work to do finalising the finishing touches of the design such as plant types and the layout of some street furniture and wayfinding signage. This will be an ongoing process as we continue to work with the community and stakeholders.

Leura Station Upgrade Design

New lift and gently inclined ramp improving access to Leura for everyone

Irish strawberry tree on platform retained and protected

Extent of platform canopy minimised in response to community feedback

Awnings surrounding the lift designed to reflect shopfront awnings in Leura Mall

Architecturally designed specifically for Leura by specialists in heritage architecture

Size and scale of structures minimised with clear protection screens to maintain views

Kiss and ride in front of formalised taxi rank

Plants and garden beds to complement the Leura village landscape

Materials and colours chosen in keeping with the existing village character

Artist's impression

Site establishment works

In the first weeks of January 2017, site establishment works will commence to prepare the site compound for the Leura Station Upgrade prior to construction. This will include works such as the installation of temporary site sheds, hoarding and fencing. The site compound will be located in rail land just off the Greater Western Highway and outside the main centre of Leura to minimise impacts on the community. A smaller storage area will also be located on Railway Parade.

Keeping the community informed

Transport for NSW thanks the community and local businesses of Leura for the feedback received in response to the Leura Station Upgrade Review of Environmental Factors.

Transport for NSW is committed to providing regular updates throughout the project to keep you informed as the project progresses. Further information will be provided in January regarding the site establishment works.
